## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species 1, shown in Figure 12 is directed to a skate having a flexible base and wherein the base is neutrally biased. Species 2, shown in Figure 13 is directed to a skate having a flexible base and wherein a biasing device is mounted to the frame for biasing the frame away from the base. Examiner acknowledges that a first action has already been conducted on the claims, but Examiner misconstrued the claim language of claims 35 and 37-41. As set forth in Applicant's remarks on page 5, the only way to have a neutrally biased base is not to have a biasing member between the base and the frame, as shown in Figure 12. Whereas, the other independent claims require a biasing member between the base and the frame, which is shown in Figure 13. Therefore, Examiner is now requiring election between these two species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 3618

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
